

The first of several silos to arrive at Aussie Farmers Dairy's Camperdown site.

Rolling into action

The first of several large milk silos arrived in Camperdown over the weekend as part of Aussie Farmers Dairy's factory refit.

The two silos arrived on Saturday morning, one with a 60,000 litre capacity, the other, 30,000 litres.

Larger silos are expected to arrive about mid-week fol-

lowed by a number of semi-trailer loads of related equipment.

The deliveries are in line with the company's plans to begin operations at the site

prior to Christmas, employing between 30 and 40 staff.

The company plans to distribute processed milk from the site via its Aussie Farmers Direct franchise.
